Night owl dvr-ahd10b-81-rs factory reset

There are many reasons why you may need to factory reset your Night Owl DVR or NVR. If there are errors or issues with your CCTV security system, starting from scratch and having your equipment on factory default may help solve such technical issues. Resetting your Night Owl recorder to Default Settings will not delete the recordings in the DVR/NVR's hard drive. Only the System's settings will go back to the factory settings, the footage itself will still be there. Once the factory reset is done, you can create a new password for your machine. Below we've listed the factory reset steps for various Night Owl DVRs or NVRs: Night Owl Factory Reset procedure Factory reset for AHD10, HDA10, HDA30, NVRH5, NVR IH8, NVR IC8 Series Applicable to these Night Owl models: DVR-AHD10B-41, DVR-AHD10B-RS, DVR-AHD10B-81-RS-2, DVR-HDA10PB-8, DVR-BBHD10PB-82, DVR-HDA10PB-82, DVR-HDA10PB-82, DVR-HDA10PB-81, DVR-HDA10PB-162, DVR-HDA10PB-161, DVR-HDA10LB-81, DVR-HDA30B-162, NVR-IH802-8, NVR-IH802-16, NVR-IH804-16, NVR-IH808-16, NVR-IC802-8, NVR-IC802-16, Go to DVR/NVR Main Menu (You may need to log in after this step). Click on Advanced Tab. Maintain Tab will appear by default. On this screen locate the Load Default option and click on it. Select "All" to factory reset all your DVR/NVR Settings and click on Save. Your system may restart after this step (Older systems do not restart). Applicable to these Night Owl models: DVR-THD15W-45, DVR-THD30B-81, DVR-THD50B-81, DVR-THD80B-82. Right-click anywhere on the screen and the drop-down menu will appear. Click on Main Menu (you may need to log in after this step). Go to Maintenance option. Click on Default Sub-tab. On this screen, click on Factory Defaults to restore all parameters to default settings. Your system will restart after this step. Factory reset for Night Owl XHD Series DVR Applicable to these Night Owl models: DVR-X3-81, DVR-X3-8, DVR-X3-161, DVR-X3-16, DVR-XHD20W-41, DVR-XHD50B-41, DVR-XHD50B-81, DVR-XHD50B-82. Right-click anywhere on the screen and the quick launch bar will appear at the bottom of the screen. Click on Main Menu (You may need to log in after this step). Click on Advanced Tab. Maintain Tab will appear by default. On this screen locate Load Default option and click on. Select All to factory reset all your DVR Settings and click OK. Your system will restart after this step. Factory reset for the Night Owl WNVR Series Applicable to these Night Owl models: WNVR-20B-4, WNVR-20B-8. Right-click anywhere on the screen and the quick launch bar will appear at the bottom of the screen. Click on Main Menu (You may need to log in after this step) Go to Maintain Tab. Select Factory Default Sub-tab on the left menu On this screen, Select All to factory reset all your NVR Settings and click on Apply Your system will restart after this step Disclosure: Some of the links in this post are Amazon affiliate links. This means if you click on the link and purchase any item, we will receive an affiliate commission at no extra cost to you. Thanks for your support! If you have a Night Owl DVR or NVR and you've forgotten or lost the password, there's an easy way to reset the password. You can follow the on-screen instructions and have a master password emailed to you in a few minutes. The method shown here works for most of the DVRs or NVRs manufactured by Night Owl, however if your recorder is too old (like more than 7 years old), then it won't work. The recordings will not be erased by this procedure. So, follow the steps below to reset the password for your Night Owl recorder (DVR or NVR). The Night Owl password reset procedure works for these models (not all models are listed): DVR-AHD10B-41, DVR-AHD10B-RS, DVR-AHD10B-81-RS-2, DVR-HDA10PB-8, DVR-BBHD10PB-82, DVR-HDA10PB-82, DVR-BBHD10PB-81, DVR-HDA10PB-162, DVR-HDA10PB-161, DVR-HDA10LB-161, DVR-HDA10LB-81, DVR-HDA30B-162, NVR-IH802-8, NVR-IH802-16, NVR-IH804-16, NVR-IH808-16, NVR-IC802-8, NVR-IC802-16, DVR-THD15W-45, DVR-THD30B-81, DVR-THD50B-81, DVR-THD80B-82, DVR-X3-81, DVR-X3-8, DVR-X3-161, DVR-X3-16, DVR-XHD20W-41, DVR-XHD50B-41, DVR-XHD50B-81, DVR-XHD50B-82, WNVR-20B-4, WNVR-20B-8. Step 1. Go to this page "Password Reset Tool for DVRs / NVRs" and create an account. Having an account allows Night Owl to send you a secure code to reset the DVR or NVR password. Note: To create an account, your DVR or NVR must be connected to a TV/monitor, and you must be in front of the DVR/NVR. Once you've created an account, enter the required information such as the DVR's timestamp (date), Device ID, etc, then continue on the next steps shown below. Check your email and locate the password reset Secure Code (the email is titled "Reset Password"). If you can't find the email, make sure to check the junk/spam folder. The code is valid for 24 hours only. Step 2. Using the DVR's mouse, right-click anywhere on the current screen to access the menu bar. Click any icon on the menu bar (it doesn't matter, just click anything on the menu bar). Step 3. Select "Forgot Password" in the DVR / NVR Menu. Step 4. Once you click "Forgot Pwd", another window will show where you can type the password reset secure code acquired in the first step. Step 5. Enter the Password Reset Code into the "Secure Code" field, then left-click the mouse just below the onscreen keyboard. Click "OK" to continue. Note: If the Password Reset Secure Code does not work: Either the current date on the DVR / NVR or the UID / ID was incorrectly entered into the Password Reset Tool. Return to the Password Reset Tool website and start over. Step 6. Follow the on-screen steps to create a new password. Confirm the new password. Step 7. Once the password reset is successful, and depending on the DVR / NVR model, it may or may not automatically reboot after the password is reset. If the device doesn't automatically reboot, unplug the DVR / NVR power adapter from the back of the device. Wait 30 seconds and plug it back in. Note: Return to the browser window where you originally reset your password (Step 1) and click "Yes, it worked" to confirm the password reset was successful and to receive instructions on adding the DVR/ NVR to the app. Disclosure: Some of the links in this post are Amazon affiliate links. This means if you click on the link and purchase any item, we will receive an affiliate commission at no extra cost to you. Thanks for your support! After resetting the password used to log in to your DVR / NVR, you will need to remove and re-add the device to the mobile app. Step 2: Select "Forgot Password" in the DVR / NVR Menu. Step 3: Locate the Password Reset Secure Code found in the "Reset Password" email. NOTE: Check your Junk/Spam folder if the email is not in your Inbox. Step 4: Enter the Password Reset Code into the "Secure Code" field, then left-click the mouse just below the onscreen keyboard. Click "OK" to continue. NOTE: If the Password Reset Secure Code DOES NOT work: Either the current date on the DVR / NVR or the UID / ID was incorrectly entered into the Password Reset Tool. Return to the Password Reset Tool website and start over. Step 5: Follow the prompts to create a new password. Step 6: Confirm the new password. Step 7: Once the password reset is successful, and depending on the DVR / NVR model, it may or may not automatically reboot after the password is reset. If the device doesn't automatically reboot, unplug the DVR / NVR power adapter from the back of the device. Wait 10 seconds and plug it back in. Now that you have reset the password used to log in to your DVR / NVR, you will need to remove and re-add the device to the mobile app. Click on your mobile app below and follow the simple instructions to remove and re-add the device.
